REVENUE DEPARTMENT

## HELLO GLAD FANS:-

It is indeed a pleasure to send you our 1950 catalog of Gladiolus Bulbs which feature a variety of fine gladiolus. AT this time we wish to kindly thank our customers of the past season for their many orders and letters of thanks for stock received. May we continue to please you with satisfied purchases for years to come.

Our aim is to please every customer whether order is large or small for we know there is no advertisement more important to any business than a satisfied customer. Each and every order is given the same consideration and attention, whether it is a new customer or one who has purchased from us for years.

We are not in the true sense of the word a commercial grower, but grow these bulbs chiefly to find a control for the various diseases affecting them. (Call it a hobby, craze, or anything you like, but we get just as much enjoyment in growing a field of healthy stock as many of you do in winning a blue ribbon at the shows.)

The main factor in the superior quality of our bulb has been cleanliness with no over crowded conditions during drying and storing period, and what we believe to be ideal drying and storing methods for our particular climate. (no specific method can be followed by everyone due to the varying climatic conditions in which you live.)

Our State Inspector has given us the rating of the cleanest and finest bulbs grown in the State of Wisconsin for the past several years and that can only be accomplished by many hours of particular labor. Yet with that honor bestowed upon us, WE HAVE NEVER CLAIMED THEM TO BE 100% DESEASE FREE. (we know there is no bulb free of disease) WE ONLY CLAIM THEM TO BE DESEASE CONTROLLED.

Besides the particular labor involved in drying and storing of bulbs all labor in the field is done by hand, planting, cultivating, weed pulling and digging, at which time bulbs not meeting our standard of health are discarded, not even brought in the drying shed. No 2-4 D or DDT has ever been used in our plantings as a spray or any other use, perhaps that too is a reason of the good quality of our bulb. Time and space does not permit me to go into detail to describe our method of producing the superior quality of our stock; the special built storage shed, the daily turning of bulbs, the careful watching of humidity and temperature in drying and storage, etc.

With all the work and expense involved in attaining the high standard in our stock, we cannot meet the prices of machine handled stock or the price competition being staged by many commercial growers. ALWAYS REMEMBER, IT'S NOT THE PRICE OF THE ARTICLE BUT THE VALUE RECEIVED. You may be surprised what a whale of a difference a few cents make. Our only regret is that every perspective buyer cannot see our stock before ordering, however we do invite those within traveling distant to come in and see them personally before ordering. I can safely predict your order will be larger than anticipated.

We extend to the public a cordial invitation to visit us at any time when flowers are in bloom from the end of July until frost, at digging time, or when bulbs are in storage. We are located on U.S Hwy 51 about 7 miles south of Stevens Point and about 4 blocks south of intersection of 51 and 54. It is the farm on the curve across the road from Roger's Garage & DK Service Station.

Our policy has always been to sell only bulbs grown in our field. We too could have the privilege to listing many introductions on the market, but we are not a JOBEER and feel we would rather raise all bulbs listed in our catalog. To purchase them immediately when introduced would be a big investment, for often the bottom is dropped out of the

price in a few years if it does not sell well, and we would be holding the bag with a tremendous loss. We will however get them for increase to list, just as soon as prices are set and they remain in demand.

As to our introductions, they are released by the comments of our visitors to the field. We feel the remarks and favoritism for them by the visitors warrants an introduction as they are the people represent the Glad Fans who would be interested. All our introductions are sold exclusively by us and we hope you too will find favor with them.

### TERMS

No order accepted later than April 15th, all orders must be \$3.00 or over unless you wish to pay your own postage. Send money with order, special delivery not necessary as mail is received twice a day.

Bulbs will be sent prepaid by Parcel Post when danger of frost is past and weather permits safe mailing. If you wish to pay your own postage, we will add bulbs to amount of mailing cost.

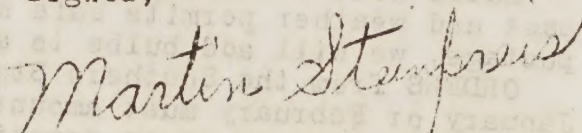

ORDERS from the Southern States desiring the bulbs during December January or February must amount to \$5.00 or more as bulbs must be shipped by express, as we sometime have weather below zero during that time. More than one order to that amount can be sent, packed separately in one shipment to same city if desired.

UNDER NO CONDITION will we substitute varieties without your permission and then only with bulbs priced as closely as possible to those ordered. MANY DEALERS DO substitute the more expensive varieties when out of those ordered, but it is our policy to be fair and just and to protect the customer who pays the big price for the bulb. We would like your permission to substitute in size should we be out of size ordered. If we do not have variety ordered and you do not give a second choice, we will cheerfully refund your money.

Our count has always been liberal and many extras are included as our customers can well testify. All bulbs are STATE INSPECTED in field and in storage. Helpful suggestions will be sent along with each order on planting and care of bulbs. All orders will be acknowledged with a card immediately, and placed on file in order received.

I, personally, will make every effort to make each purchase completely satisfactory. If for any reason you are not satisfied with order when you receive it, you may return stock at my expense and I will guarantee to refund your money without any questions asked.

signed,

Martin Steinpreis

#### GLADIOLUS INFORMATION

Large bulbs average from  $1\frac{1}{4}$  inch or larger in diameter, medium bulbs from  $\frac{3}{4}$  to  $1\frac{1}{4}$ , and small bulbs from  $\frac{1}{2}$  to  $\frac{3}{4}$  inches.

## DISCOUNTS

Orders of \$25 or more will receive 1 large bulb of our New Introduction, WISCONSIN GOLD.

Orders of \$15 or more will receive 1 Large LAVENDER DIAMOND.

Orders of \$10 or more will receive 1 Large NANETTE, or 1 large bulb of CHAVANTES.

All other orders will receive bulbs in proportion to the old discounts previously given.

If you do not desire the above, you may deduct 5% cash discount on orders of \$5 to \$15, and 10% on orders over \$15. This does not apply to purchases of Wisconsin Gold and Kublai Khan.

## OUR INTRODUCTIONS

WISCONSIN GOLD (Steinpreis-1950-seedling of Golden Goddess) Wisconsin Gold has all the fine qualities of its parent with the addition of having a finer, cleaner, healthier bulb. It is just a shade lighter in its clear color of yellow and has no markings with needle-pointed petals. Has 8 to 10 florets open on a 22 bud spike, 4 to 4½ inch blooms and grows about 50 inches tall, blooms in about 35 days. Our reason for this introduction is the good quality of the bulb and we believe it will become a good commercial as the florets are well attached and very close to stem not as tightly bunched as its parent, but comfortably arranged, Type is formal, and good propagator and germination of bblts.

Bulb any size \$6. 10 Bblts sold only with bulb at \$6-Total \$12

LAVENDEI DIAMOND(1943-Steinpreis) A beautiful deep lavender, darker than Patrician, about the flecking in Lavender Queen. The best description we can give is a Max Roger. The darker lavender blotch on lower petals does not detract from its beauty but enhances it with a pale yellow diamond placed in the blotch from which its name was selected by the visitors to the field. The edge of the petals sometime appear flecked depending on weather when blossoms open. It was approved the best choice of all the deep lavenders in the field by visitors and florists alike, which may be an indication of it becoming immensely popular as a florist glad and for cut flower trade. Grows 60 inches tall under good culture, 13 to 20 buds, 6 to 7 florets open with 4 showing color and 4½ to 5 inch blooms, Good germination and a fair propagator of bulbs and blooms in 30 to 35 days. Has giant size bbs and has short foliage which permits long cuttable spikes.

LARGE 1-~~\$~~5.00

MED. 1-~~\$~~3.50

SMALL 1-~~\$~~2.00 Bbs. 1-50¢

KUBLAI KHAN(1943-Steinpreis, Mid-season) The Sport of Sports from the famous Genghis Khan. A true salmon color identical in every respect as Genghis Khan with exception of color, same strong heavily ruffled substance in petals, heavy foliage and strong spike. 5 to 6 blooms open with 5 showing color and 6 inch florets or over. Its color is softer than Genghis Khan and is more pleasing to the eye.

LARGE 1-~~\$~~20.00

MED. 1-~~\$~~15.00

SMALL 1-~~\$~~10.00

CHAVANTES(1943-Steinpreis, Late mid-season) A bright scarlet red with darker blotch in throat, exhibition formal, 13 to 20 buds, 8 to 10 open and remaining buds showing color. Grows 60 inches tall with 28 inch flower-head and 4 to 5 inch florets, does not fade in sun like most reds. Double row of blooms well attached to spike.

LARGE 1-~~\$~~3.50

MED. 1-~~\$~~2.00

SMALL 1-~~\$~~1.25 Bbs. 1-35¢

BRILLIANT LIGHT(1946-Steinpreis,Early mid-season) A beautiful orange salmon scarlet with a clear tone,light yellow lip with white line running through center of petal ending near tip. 5 to 7 well attached blooms open with 5 showing color,13 buds on 26 inch flowerhead with 5½ inch florets. Is very attractive and blends well with any color, will make a good florist variety.

LARGE 1-\$1.00

MED. 1-75¢

SMALL 1-50¢

Bbts. 3-25¢

ASPASIA(Pronounced AS-PA-SHE-A) Scheer-1945,Mid-season) An apple blossom pink with creamy throat and yellow lip similar to its sister seedling White Gold. Blooms are wide open well attached to spike. 5 to 7 open with 5 showing color and 5 to 5½ inch blooms, a Florist glad.

LARGE 1-\$1.00

MED. 1-75¢

SMALL 1-50¢

Bbts. 3-25¢

NANETTE(Scheer-1945-Late Mid-season) A stunning glad with sheer beauty, the three upper petals are a delicate baby pink with the lower petals shading from a white throat to a delicate baby pink edge. 5 to 7 florets open with 5 showing color on a 18 to 20 bud spike. Formal type, grows about 60 inches tall. A grand florist glad with blooms close to stem making it a good shipper. Good bbt. propagator and germinator.

LARGE 1-\$2.50

MED. 1-\$1.75

SMALL 1-\$1.00

Bbts. 1-25¢
